

# Improve Your Structural Foam Molding Process

## Foamazol™ Chemical Foaming Agents Can Save You Money

Bergen International's line of Foamazol™ CFAs provides structural foam molders many cost saving benefits.

- Faster Cycle Times – Up to 30% Cycle Reductions
- Excellent Nucleation for Better Distribution of Gas
- Better Control of Cell Size and Cell Uniformity
- Less Nitrogen Usage
- Lower Processing Temperatures and Pressures Required
- Smoother Surfaces/Reduced Elephant Skin

Product such as Foamazol™ 61 is used to control the size, shape, and distribution of gas bubbles or cells in structural foam parts made from olefins like HDPE and PP. Our Foamazol™ 64 CFA is intended for applications where maximum density reduction is required. Typically used for cell size control, Foamazol™ 64 is ideal for structural foam molding. We also offer custom product development and technical assistance.

Contact Bergen International today to see how we can improve your structural foam molding process at **866.554.4951** or [sales@bergeninternational.com](mailto:sales@bergeninternational.com).

Since 1999, Bergen International has focused solely on chemical foaming agents—offering endothermic, exothermic and endo/exo blends compatible with most of the polymers used in foaming applications. We offer superior **Customer Service**—providing the right product, in the right physical form, and reasonable cost, when the product is needed. In addition, Bergen International's staff has extensive formulating and processing experience.
