

Improve Your Wood-Plastics Composites Extrusion Process

Foamazol™ Chemical Foaming Agents Can Save You Money

Many processors find that specific polymer/wood content blends and the high moisture content of wood flour require unique foaming agent formulations.

Bergen International has Foamazol™ CFA products for:

- Faster Extrusion Rates
- Consistent High-Quality Foam Structure – very fine, uniform cell structure with consistent density
- Reduced Polymer Usage
- Specific Polymers – ABS, Polypropylene, PE, etc.
- Amount of Wood Filler Used – 5%, 15%, 25%, 50%, etc.
- Moisture Content of Wood Filler
- Products for Virtually any Polymer/Wood Combination

If you are currently foaming, or contemplating foaming wood-composites, Bergen International can help you. Among our line of Wood-Plastic Composite CFAs are Foamazol™ 813 and Foamazol™ 77

Contact Bergen International today to see how we can improve your wood-plastics composites extrusion process at **866.554.4951** or sales@bergeninternational.com.

Since 1999, Bergen International has focused solely on chemical foaming agents—offering endothermic, exothermic and endo/exo blends compatible with most of the polymers used in foaming applications. We offer superior **Customer Service**—providing the right product, in the right physical form, and reasonable cost, when the product is needed. In addition, Bergen International's staff has extensive formulating and processing experience.
